

DCL International Inc.

DCL Exhaust Monitor/Logger

The Display Panel:

The Wiring Harness:

Product Features:

- Display Panel is rated IP 67 for protection against water and dust
- Indicator Bars provide operator with real time relative temperature and backpressure readings
- Problem Code LED Bar indicates the type of problem the system is experiencing
- System includes the thermocouple and backpressure connection set for easy installation
- Power requirement is 10-30 VDC (typical of most application batteries)
- Two-Channel (backpressure & temperature) recording for analysis of 8000+ hours of operating history
- Backpressure and temperature recorded every 10 seconds
- Meets all CARB requirements for datalogging and emission monitoring of diesel particulate filter systems
- Communicates with modbus protocol for integration into customer's own system*
- Options available for secondary display
- Downloads of logger data can be performed to troubleshoot operating problems via a Download Kit**

*CAN I/O extension module also available

**Download Kit sold separately
